

BOMBAY GAZETTE. *Extraordinary,*

SUNDAY, 25th JANUARY 1818.

The American Ship *Malabar*, Captain Ofme, has just anchored in the harbour, having left Cowes, on the Isle of Wight, on the 5th of October, she has brought no Letters, but the Captain has been good enough to furnish us with some English papers from the 5th of September, to the 2d of October.

The *Malabar* spoke the Bengal, *Cuthbertson* from Liverpool, bound to Calcutta near the line.

Cobbett has at length fallen foul of Sir *F. Burdett*. His last *Register* is wholly occupied in an attack on the Baronet, whom he accuses of deserting the cause of reform during the last Session of Parliament: this conduct *Cobbett* attributes in part to the "courtly air of Brighton," and to Sir *Francis's* ambition, which, he says, will allow of no competitor.

The town of *Sligo* has suffered more than any other part of Ireland by the malignant fever. A gentleman lately arrived in London, states, that out of a population, not exceeding 15,000, upwards of a thousand persons have fallen victims to the disease in the town alone.

Miss *PEARSON*, the rich heiress of Harporly, in the county of Durham, came of age last week, on which occasion great rejoicings took place amongst her tenantry, and on the following morning she gave her hand to G. H. *WILKINSON*, Esq. Barrister at Law, of Harley-street, Cavendish-square.

SEPT. AGRICULTURAL REPORT.

In the southern and forward counties the white corn is generally secured; it is locally abundant, and of good quality, but subject to a considerable number of drawbacks: a month hence will be sufficiently early to report more specifically on these points. The same may be said of the southern and best parts of Scotland. The northern and backward districts have been essentially benefitted by the fineness of the current month; but, for the completion of their harvest, must depend entirely upon the succeeding, since much of their corn is not even yet ripe. Beans will be nearer to an average crop than was lately expected; barley, oats, and peas, the largest. Hops have greatly improved. Fruit generally deficient, both in this country and upon the Continent. From the constant rains in August, the fallows are imperfect, & corn discoloured in many places. Potatoes & turnips in great abundance. Great damage has been sustained, both in the last and present year, by the Lent corn being suffered (in the south) to lie in the swathe. Long wool maintains its price, and is in demand. Cattle, both fat and store, considerably lower.
